EDUCATION

B.S. Artificial Intelligence
DUET, Karachi
2023 – Present | CGPA: 3.41

Intermediate (Pre-Eng.)
Karachi Board | 2021 – 2023

TECHNICAL SKILLS

Python | C | C++ | SQL
TensorFlow | Keras | PyTorch
scikit-learn | pandas | NumPy
OpenCV | YOLO | LangChain
FAISS | Cohere NLP | Flask
Streamlit | Tkinter | Git
Jupyter | Google Colab

LANGUAGES

Urdu — Native
English — Professional

INTERESTS

Artificial Intelligence
Computer Vision
Deep Learning
Software Development

PROFESSIONAL SUMMARY

Motivated B.S. Artificial Intelligence student (CGPA 3.41) at DUET with hands-on experience building deep learning pipelines, computer vision systems, and LLM-based applications. Projects include a Retrieval-Augmented Generation (RAG) assistant deployed on Streamlit Cloud, CNN-based emotion recognition, YOLO object detection, and a multi-modal AI assistant. Passionate about applying machine learning to real-world problems and seeking an AI/ML internship to grow in a professional team environment.

TECHNICAL SKILLS

ML / DL Frameworks: TensorFlow, Keras, PyTorch, scikit-learn, YOLO (Ultralytics)
Languages & Data: Python, C, C++, SQL | pandas, NumPy, matplotlib, seaborn
CV & NLP: OpenCV, YOLO, Haar Cascade, Tesseract OCR, Google Gemini API, Cohere NLP, SpeechRecognition
RAG & Deployment: LangChain, FAISS, HF Embeddings, Groq API, Streamlit, Flask
Dev & Tools: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Oracle DB, Tkinter

PROJECTS

Quranic AI Assistant — RAG with FAISS & Groq LLM

GitHub: *github.com/faaiz-ahmed/quranic-rag-assistant* | **Live Demo:** *Streamlit App*

- Built a Retrieval-Augmented Generation (RAG) app that answers questions about Surah Al-Fatihah from an English-translation PDF and cites page-level sources.
- Pipeline: Tesseract OCR for scanned pages → ~500-character chunking → all-MiniLM-L6-v2 embeddings → FAISS similarity search → Groq LLM grounded only in retrieved passages.
- Developed a Streamlit chat interface (LangChain) with source viewer, model/top-k controls, and PDF upload; deployed on Streamlit Cloud.

Face Emotion Recognition — CNN + Live Webcam

GitHub: *github.com/faaiz-ahmed/Face-Emotion-Recognition*

- Trained and compared 4 architectures (CNN from scratch, MobileNetV2 frozen / fine-tuned, VGG-style) on FER-2013 for 7-class emotion recognition; best model (CNN) reached 63.64% accuracy and 0.61 macro-F1.
- Built real-time inference with Haar Cascade face detection, CLAHE preprocessing, 20-frame prediction smoothing, and live confidence-bar and FPS overlay.

Sign Language Detection — YOLO11n

GitHub: *github.com/faaiz-ahmed/Sign-Language-Detection-using-yolo*

- Captured and labeled a custom gesture dataset (LabelImg), trained YOLO11n with Ultralytics, and evaluated with mAP, mAP50, and mAP75.
- Delivered live webcam detection and a Flask app that streams detections from a phone camera (IP Webcam) to a browser.

Fraday — Multi-Modal AI Desktop Assistant

GitHub: *github.com/faaiz-ahmed/AI-Voice-Assistant-Python*

- Engineered a Tkinter-based assistant combining speech recognition, text-to-speech, NLP (Cohere), and image analysis (Google Gemini API).
- Automated voice/text-triggered tasks: web search, email and WhatsApp messages, weather and news updates, and application launching via Python.

CERTIFICATIONS

- Career Essentials in Generative AI – Microsoft & LinkedIn Learning
- Intro to Generative AI – Google Cloud
- Virtual Technology Consulting Internship – Deloitte Forage (July 2025)
- Bano Qabil 2.0 LRN Certificate (Dec 2023 – Mar 2024)
- LinkedIn Learning: Generative AI | Ethics in AI

EXTRACURRICULAR ACTIVITIES

- Member – AI Society, DUET
- Participant – Bano Qabil 2.0 (government-backed intensive tech training, Karachi)
